MC Electric having a public event on May 3

MC Electric is having an event on May 3rd, 2008. Here's a message from MC Electric owner, Steve Mayeda:

"Over the past 12 months our sales of electric vehicles have increased many times over. In December [2007] alone we sold 30 cars. What I didn't realize was [what] the impact on our environment would be with all these cars driving on electricity and not gas.

To date our customers have logged over 60,000 miles, when I converted the mileage into gas and the amount of CO2 not released into the atmosphere the number was over 70,000 pounds. This number made me think that we need to honor our customers, the pioneers, the true green people of Washington.

To honor these people we are having a celebration Saturday May 3rd at MC Electric Vehicles. The event will be from 12 to 2 pm, and our address is 1200 S. Dearborn Street, Seattle 98144.

We will have State Rep. Mary Lou Dickerson of the 36th District to speak, and also Ian Clifford, the founder and CEO of ZENN, will also be coming to the event. I am not sure how many EVer's will be coming but I suspect over 50 [people]."
